

To the FCC, I respectfully ask you to reject the NAB's petition 04-160. I find it incredible that there is an attempt to limit my right to hear local news and weather. I have an xm radio and also gave one to my granddaughter. I pay for this service because I want to keep the same variety of channels as I travel thru this great country of ours. We go to the mountains for the summer where there is no good reception available. I truly appreciate the exclusion of annoying commercials and other nonsense. Please consider the wishes of XM listeners! I need to hear local news and weather if this is my only radio. Thank you for your consideration. Mary Van Rooy
